

# Can't Get Workflow Scheme for Project while Syncing Statuses

Last Modified on 01/13/2026 1:38 pm EST

## Problem

You're syncing statuses with the Jira Cloud instance and you've got an error that mapping cannot be found.

### Error Details:

```
javax.script.ScriptException: com.exalate.api.exception.IssueTrackerException:  
Can not get workflow scheme for project 'TEST'. Known projects / workflow schemes: '[:] Please contact Exalate Support.  
Also failed to get it through REST API: Request: GET /rest/projectconfig/1/workflowscheme/TEST
```

### Issue Tracker Error

Known projects / workflow schemes: '[:] Please contact Exalate Support. Also failed to get it through REST API: Request: GET /rest/projectconfig/1/workflowscheme/TEST Auth: user Response:
```

### Unauthorized (401)

## Cause

If the statuses don't have global transitions Exalate cannot get the status mapping.

Unfortunately, [Jira Cloud REST API](#) does not allow getting **all statuses** from a **workflow** of an issue.

## Solution

There is an unofficial REST API provided by Jira's project-config plugin you can use to get the

required data.

You need to retrieve the workflow scheme in order to configure additional mapping with the workflow scheme details:

- map project key to the workflow scheme ID.
- workflow scheme ID to workflow details(all workflow details and configuration settings).
- workflow name to workflow details(all workflow details and configuration settings).
