

# GitHub - Version 5.0.14

Last Modified on 11/25/2022 4:11 am EST

Released for GITHUB on Dec 9, 2020

From now on, you will receive a verification link when registering an instance. This simplifies the process of creating an Exalate proxy user account and improves security. Also, Exalate can now convert data from GitHub Markdown to HTML, which improves sync of headings, text, lists, and links. In addition, we fixed various bugs, and made UI improvements

## In this release

### Improvements

EXE-801	We updated the process of registering an Exalate instance. From now on, you will receive a verification link to your email. This simplifies the process of creating an Exalate admin account and improves security
GITHUBNODE-191	Now Exalate for GitHub can convert between GitHub Markdown to HTML. This improves sync of headings, text, lists and links
EXACOMP-907	Script error messages now redirect to the exact line where you encounter the error
EXACOMP-914	Improved trigger performance and execution logic
GITHUBNODE-163	Error messages are not sent to users who uninstalled Exalate

### Bug fixes

GITHUBNODE-187	Fixed bug with sync between GitHub and Jira Server being stuck after creating an issue and syncing it through an existing connection
EASE-6768	Fixed bug with assignees not syncing correctly between Github and Jira
EXACOMP-854	Fixed bug with Errors page being shown in the Entity sync status page
EXACOMP-897	Fixed bug with deactivating connections being added to sync queue
EXACOMP-757	Fixed bug with instances crashing after deleting a connection
EXACOMP-885	Fixed issue with attachments not syncing between private and public instances

### UI updates

GITHUBNODE-177	Updated log in screen
EXACOMP-844	<p>Added various filters for the Sync Queue:</p> <ul style="list-style-type: none"> <li>• by connection</li> <li>• by local issue key</li> <li>• by remote issue key</li> </ul>
EXACOMP-878	Added a filter by issues in the Errors tab
EXACOMP-882	Rules is now the default tab in the Edit connection screen
EXACOMP-916	Raised the maximum amount of characters for the connection name up to 255
EXACOMP-840	<p>You can now save changes in a connection by pressing the following hotkeys:</p> <ul style="list-style-type: none"> <li>• <b>Ctrl + S</b> on Windows or Linux</li> <li>• <b>Cmd + S</b> on Mac</li> </ul>
EXACOMP-913	Added possibility to connect issues from the Entity Sync status tab
