

# ServiceNow - Version 5.1.1

Last Modified on 11/25/2022 4:39 am EST

Released for SERVICENOW on Jan 29, 2021

Now you can sync data to ServiceNow import sets. This is useful if you don't want to apply changes directly into a production table. For more information, check out [How to sync entities to an import set with Exalate for ServiceNow](#). You can also set up a customer monitor to check the status of your sync with REST API calls. We also made a bunch of performance improvements, UI updates, and bug fixes.

## In this release

### Improvements
