Jira Cloud - Version 4.1.2-AC (internal: 5.0.60)

Last Modified on 11/25/2022 4:26 am EST

Released for JIRA CLOUD on **Nov 18, 2020**

In this release we improved sync speed, fixed a bug for admin verification, and fixed some other bugs

In this release

Improvements

JCLOUD-1496	Sync is now faster because delete events consume less resources

Bug fixes

JCLOUD-1495	Fixed bug with HTML being rendered incorrectly in connections from Jira Cloud
EXAEDIT-1156	Admin verification in Visual mode wouldn't start if you entered the instance link in the Destination instance URL. Now it works as intended
EXACOMP-911	Fixed bug with Connect not syncing one Jira issue to multiple Zendesk tickets
EXACOMP-872	Fixed bug with JWT token sometimes being accessible in connections between Jira Cloud and Jira Server
