

Why Am I Not Getting Email Notifications?

Last Modified on 03/04/2024 11:10 am EST

Problem

You have set up the Exalate notifications in your node, but no notifications are sent.

Cause

Currently, Mimecast (and maybe other mail servers) are bouncing emails from mail.com due to an unknown reason.

Please make sure that emails from exalate.com are not being bounced.

Solution

Product

Configure the 'permitted senders' option on your mail server.

In the case of Mimecast - check the following document

<https://community.mimecast.com/s/article/Configuring-Permitted-Senders-Policies-1067720131>
