

# How to Sync Organization Field Values to a Text Custom Field in Jira Cloud

Last Modified on 04/09/2024 9:57 am EDT

This article shows how to sync Organizations field values from Jira Service Desk to a text custom field in Jira Software.

## Source Side

Add the code below to the **Outgoing sync**

```
// ORGANIZATIONS SYNC
replica.customKeys."Organization Names" = issue.customFields."Organizations".value?.collect { org -> org?.organizationName }?.findAll()
// END: ORGANIZATIONS SYNC
```

## Destination Side

Add the code to the **Incoming sync** to add the received Organization names into the text custom field. Please replace the custom field name with your custom field name in the code below.

```
//add organization names into the "My Text Field"
issue.customFields."My Text Field".value = replica.customKeys."Organization Names"?.join(",")
```
