

How to Sync Pull Requests on GitHub

Last Modified on 04/10/2024 5:17 am EDT

This article shows how to synchronize pull requests from GitHub to Jira issue.

Introduction

Exalate considers GitHub pull requests as issues. Source side (GitHub). To start the synchronization of pull requests you need to [create a trigger](#) with the following query.

```
is:pr
```

Incoming sync

Send the issue type data from GitHub

```
replica.type = issue.type
```

h2 id="HowtosynchronizepullrequestsonGitHub?-Destinationside(Jira)">Destination side (Jira)

By default received pull requests are considered received issues. You can distinguish the received pull requests from the issues by setting a separate issue type. Check the example below for more details.

Incoming sync

Set '*Pull Request*' as the issue type name for the received pull requests from the GitHub.

```
if(replica.type.name == "Pull Request"){  
  issue.typeName = "Pull Request"  
}
```
