

Automation For Jira Integration

Last Modified on 03/05/2024 9:23 am EST

Automation for Jira combines the functionality of dozens of individual apps with the ease of a visual rule builder. Exalate in combination with this add-on proves to be an extremely powerful combo allowing the implementation of advanced use cases.

Important: This add-on is an example of the integration of an app such as 'automation for Jira' with exalate. It is **unsupported**. Access to the source code can be provided. Contact our [Support](#) for more information. Jira on-premise only

How to Install Automation for Jira on-premise?

You will have to install a number of apps

- Automation for Jira on-premise ([Marketplace listing](#))
- Exalate for Jira on-premise version 4.0.0 or higher ([marketplace listing](#))
- Exalate Automation-for-Jira Integration bridge (Download version 1.0.0 from [here](#))

What does it Provide?

The integration bridge provides 2 actions

Exalate
Exalate issue with relation.

Unexalate
Unexalate issues

- The Exalate action allows starting synchronizing an issue
- The Unexalate action tears down all synchronization information such that all synchronization is stopped
