## How to Generate a Personal Access Token in GitHub

Last Modified on 03/18/2024 5:49 am EDT

Personal access tokens are used to log in to Exalate for GitHub.

1. Log in to your GitHub account.

The GitHub user must be an organization member or have admin access to a repository where Exalate is installed.

**Note**: The user account that wishes to access the Exalate dashboard needs to have **organization visibility** set to **Public**.

2. Navigate to **Settings** → **Developer settings**.

Personal settings
Profile
Account
Security
Security log
Emails
Notifications
Billing
SSH and GPG keys
Blocked users
Repositories
Organizations
Saved replies
Applications
Developer settings

3. Select Personal access tokens.

GitHub Apps	Personal access tokens Generate new token			
OAuth Apps	Need an API token for scripts or testing? Generate a personal access token for quick access to the GitHub API.			
Personal access tokons	Personal access tokens function like ordinary OAuth access tokens. They can be used instead of a password for Git over HTTPS, or can be used to authenticate to the API over Basic Authentication.			
	Personal access tokens function like ordinary OAuth access tokens. They can be used instead of a password for Git over HTTPS, or can be used to authenticate to the API over Basic Authentication.			
	Personal access tokens function like ordinary OAuth access tokens. They can be used instead of a password for Git over HTTPS, or can be used to authenticate to the API over Basic Authentication.			

## 4. Press **Generate new token** to generate a new access token.

Select the scopes or permissions you'd like to grant this token. To use your token to access repositories from the command line, select **repo**.

They can be used instead of a passwore Git over HTTPS, or can be used to authenticate to the API over Basic Authentication.         Note         exalate         What's this token for?         Expiration *         90 days       The token will expire on Thu, Mar 23 2023         Select scopes	
	<ul> <li>repo</li> <li>repo:status</li> <li>repo_deployment</li> <li>public_repo</li> <li>repo:invite</li> </ul>	Full control of private repositories Access commit status Access deployment status Access public repositories Access repository invitations
	security_events	Read and write security events

Once the token has been generated, you can use it to login to your Exalate admin console.

**Note**: Make sure to save the token, because you can access it only once.
