Destination side

### Create/Change processor

```
def localUserForRemoteAssignee = userHelper.getByKey(replica.assignee.key)  
if (localUserForRemoteAssignee == null) {  
    // create the user if s/he doesn't exist  
    localUserForRemoteAssignee = userHelper.createUser(replica.assignee.username,  
        "changeme",  
        replica.assignee.email,  
        replica.assignee.displayName)  
}  
//add the user as a request participant  
issue.customFields."Request participants".value += localUserForRemoteAssignee
```
