

isGroupMember

Last Modified on 11/16/2022 9:38 am EST

Signature

Helper	userHelper
Signature	<code>isGroupMember(String username, String group)</code>
Description	Returns a boolean indicating if the user is member of the specified group.
Introduced in	0.12.0

Example use

```
//If the remote assignee exists as an administrator in our system, then add a comment
if(userHelper.isGroupMember(replica.assignee.username, "jira-administrators")){
    String message = "...";
    issue.comments = commentHelper.addComment(message, issue.comments)}
}
```
