workLogHelper

The workLogHelper provides functions to manipulate worklogs

JIRA CLOUD

Title	Description
addWorkLog	Adds a worklog to the worklogs list • Startdate is a date formatted 'yyyy/MM/dd' • timeSpent is a pretty formatted duration such as '1w 2d 3h 4m'
filterLocal - workLogs	Returns a list of workLogs, visible for all users.
mergeWorkLogs - with custom handling	Merges the worklogs from two sides and allows adjusting details of every synced workLog. Use a closure function to define how the workLogs should behave.

JIRA SERVER

Title	Description
addWorkLog	Adds a worklog to the worklogs list • Startdate is a date formatted 'yyyy/MM/dd' • timeSpent is a pretty formatted duration such as '1w 2d 3h 4m'
filterLocal - workLogs	Returns a list of workLogs, visible for all users.
mergeNewWorkLogs	mergeNewWorkLogs merges the differences between orignal worklogs and newWorklogs into the resulting worklogs

Title	Description
mergeWorkLogs - with custom handling	Merges the worklogs from two sides and allows adjusting details of every synced workLog. Use a closure function to define how the workLogs should behave.
