

debug.error

Last Modified on 04/09/2024 7:02 am EDT

Signature

Helper	debugHelper
Signature	<code>debug.error(string)</code>
Description	Helps to raise an IssueTrackerException error with the value of the field which is not syncing. Allows to see the content of the replica and the issue (if applicable)

Example use

```
debug.error("String message")
```

Comment

When you synchronize a custom field, but the issue on the receiving side is not updated and you don't see any error.

Product

```
// throw an error with the custom field value stored in a replica  
debug.error("customFields." + customFields."Foo".value from remote side is: " + replica.customFields."Foo"?.value)
```
