nodeHelper.createUser

Last Modified on 04/01/2025 5:33 pm EDT

Signature

Helper	nodeHelper
Signature	createUser(String username, String password, String emailAdress, String displayName)
Description	Creates a new user with the provided information.
Introduced in	0.12.0

Example use

Destination Side

Create/Change Processor

```
def localUserForRemoteAssignee = nodeHelper.getUser(replica.assignee.key)
if (localUserForRemoteAssignee == null) {
   // create the user if s/he doesn't exist
   localUserForRemoteAssignee = nodeHelper.createUser(replica.assignee.displayName,
                    "changeme",
                    replica.assignee.email,
                    replica.assignee.displayName)
}
  //add the user as a request participant
issue.customFields."Request participants".value += localUserForRemoteAssignee
```

Comments

You use this method in order to update request participants whenever the assignee of the issue is updated.
