

getUserByFullName

Last Modified on 04/15/2024 6:03 am EDT

Signature

Helper	nodeHelper
Signature	<code>getUserByFullName</code> (String displayName)
Description	Returns a user object based on a displayName (Full Name) Returns a null in case: <ul style="list-style-type: none">the user full name is not foundthe Exalate user has no 'Browse Users' permissions
Introduced in	0.8

For Jira Cloud

According to the [Atlassian changes in the user privacy policy](#), Jira Cloud user may hide their email address and Full Name in the Atlassian account settings. This affects user fields synchronization since Exalate uses API to search by email. Therefore, make sure that the email and Full Name are visible for the Exalate app in the Atlassian account.

Note: The Signature introduced in 0.8 works for Azure Devops until version 5.4.0.

Example use

```
workspace.assignee = nodeHelper.getUserByFullName(replica.assignee.displayName, issue.project.key)
```
