

filterLocal

Last Modified on 04/09/2024 7:05 am EDT

Signature

Helper	commentHelper
Signature	<code>filterLocal(List comments)</code>
Description	Return a list of comments where the visibility has not been restricted (no group or role level assign to the comment).
Introduced in	0.10

Example use

```
// ensure that only public comments are sent over to the remote instance
replica.comments = commentHelper.filterLocal(issue.comments)
```

Comments

You can restrict the visibility of the comments in JIRA to a particular group of users (i.e team members, or management ...).

To restrict comments sent to the remote instance, you need to specify the filter in the outgoing `sync(data filter)`.

For Jira Service Desk 3.0 and higher

Jira has introduced internal comments, the `commentHelper.filterLocal` does not work in this case.

Please use the following code instead

```
Product
replica.comments = issue.comments.findAll { !it.internal }
```
