Jira on-premise - Version 5.4.0

Last Modified on 12/13/2022 1:18 pm EST

Released for JIRA ON-PREMISE on **November 24, 2022**

In this release, we've introduced new Exalate branding. We have also added some improvements and bug fixes.

In this release

Improvements

- CNSL-2 Introduced new Exalate branding
- CNSL-31 Added an info message when deleting a trigger from a connection
- XLT-703 Added Entity Sync Status to the Exalate Menu Panel
- XLT-1159 Confirmed Jira v.9.4.0 compatibility

Bug Fixes

- XLT-688 Fixed the errors while upgrading the Exalate version 5.0.5-Jira-7 to version 5.3.9-Jira-7
- XLT-704 Fixed the errors while using the following sync rule: 'import com.atlassian.jira.event.issue.IssueEvent' for import in the Incoming Sync rules
- XLT-943 Fixed the issue with updating the status of the Trigger from the Triggers section and under the Connection -> Triggers tab
- XLT-689 Fixed the 'Unexpected error on the destination side' during bi-directional sync using default sync rules
- XLT-692 Fixed synchronization of option values in a custom field
- CNSL-56 Improved user interaction when deleting a connection
