How to Stop Synchronization

Last Modified on 03/18/2024 12:00 pm EDT

In some cases, you would need to stop the synchronization between instances.

For example, when you use Exalate for project migration.

You can stop issue sync in different ways:

- Unexalate operation.

- Remove synchronization data using Clean-up tools

You should remove sync info on both sides to keep data integrity on both sides.
