Accept the Connection Invitation in Script Mode for Jira On-premise

Last Modified on 12/08/2022 6:49 am EST

To accept the Connection invitation you need an **Invitation Code**. The **Invitation Code** includes **pre-populated** Connection details such as Connection name, instance short names, and Destination instance URL.

You are only required to finish the configuration by accepting the invitation.

Accept the Connection Invitation in Script Mode from Jira On-premise

1. Navigate to the **Connections** tab in the Exalate console.

Click **Settings** \rightarrow **Apps** & click **Connections** under the **Exalate** menu.

3. Paste the invitation code.

Paste the invitation code that you received from the other side.

And click Next.

8. Select a project where you would like to sync issues received from the other side.

And click Confirm.

Accept invitation ×	
Select a project for the incoming sync	^
After accepting an invitation for a Basic mode connection, Exalate will be able to sync basic issue fields. The sync rules cannot be updated. Exalate will sync the following issue data: summary, description, comments, and attachments.	
Issue types are mirrored. This means that tasks will be synced as tasks, bugs as bugs, and improvements as improvements. If an issue type is not included in the basic set, it will be synced as a task.	
Please select the project where you want to create issues, received from the other side.*	
	~
< Previous Confirm	

Congratulations! The connection is set up.

Initiate connection	×
Congratulations!	
Company_A Company_A Company_B Company_B Company_B Company_B Company_B Company_B Company_B	
Connection is established.	
Configure Sync	

What's Next?

After accepting the connection invitation proceed to configure the connection. Remember, with Exalate you need to set up the configuration for both integrating sides independently, depending on your integration requirements.
