

# Accept the Connection Invitation for HP ALM/QC

Last Modified on 12/02/2022 1:42 am EST

a

To accept the Connection invitation you need an Invitation Code. The Invitation Code includes pre-populated Connection details such as Connection name, instance short names, and Destination instance URL. You are only required to finish the configuration by accepting the invitation..

## Accept the Connection Invitation in Script Mode from HP ALM/QC

1. Navigate to the **Connections** tab in the Exalate console.

2. Click **Accept invitation**.

3. Paste the invitation code.

Paste the invitation code that you received from the other side.

And click **Next**.

**Accept invitation** ✕

**Please paste the invitation code, received from your partner**

**Enter the invitation code**

```

zdGFuY2VOYW1lIjoInzc3In19
// ----- End Invitation code -----

```

Now you're ready to synchronize issues!

Feedback, questions, bumps? Send a mail to [support@exalate.com](mailto:support@exalate.com)

Next

4. Choose sync rules template.

**Single Project:**

**Initiate connection** ✕

**Single project to project synchronization**

By default the following issue data will be synchronized: summary, description, comments, labels and attachments.  
Please select the domain and project where new defects will be created.

**In what local domain do you want to create entities received from the other side?\***

Select... ▼

**In what local project do you want to create entities received from the other side?\***

**Advanced:**

The connection between instances requires sync behavior configuration on both sides. Exalate generates default sync rules to synchronize basic issue fields. You can adapt the Sync Rules later.

**Accept invitation** ✕

**📘** Exalate generates default sync rules to synchronize basic issue fields. You can adapt the sync rules only in edit connection mode.
