ServiceNow - Version 5.5.3

Last Modified on 06/13/2023 6:13 am EDT

Released for SERVICENOW on **June 13, 2023**

In this release, we've added some improvements and bug fixes.

In this release

Improvements

- XLT-3017 As a user, I want to be able to set the environment variable for the HTTP header when setting up a node so that I can add additional information when communicating between the client and server side.

- XLT-3034 As a user, I want to be able to set HTTP headers in sync processors on requests from Exalate to pass additional information when communicating between the client and server side.

- XLT-3083 As a user I want the required fields in the Login page to be marked with an asterisk so that I could clearly see what fields of the login form should be mandatory completed.

Bug fixes

- XLT-1282 Some data fields in replica.csv are shifted.

- XLT-3079 Error when synchronizing requestItems.

- XLT-3599 Add a punctuation mark: a comma or a point.

- XLT-3608 Fix alignment of text on Error List.

- XLT-3615 Icon on warning banners has changed the position.

- XLT-3621 Corrupted UI at License usages - Destination Instance URL duplicated & overlaps Connections.

- XLT-3674 Fix space between components on create triggers page.

- XLT-3676 Accept button does not redirect to the next registration screen.

- XLT-3689 Typographical error in License Tooltip.
