Salesforce - Version 5.14.1

Released for Salesforce on July 22, 2024

Overview

We are excited to announce that we are upgrading our Java runtime environment to version 17. This upgrade brings several important benefits:

- **Performance Improvements**: Enhanced efficiency and faster execution of applications.
- **Security Enhancements**: Improved security features to protect against vulnerabilities.
- **Library and Framework Compatibility**: Better support for modern libraries and frameworks, ensuring smoother integration.
- **Long-Term Support (LTS)**: Extended support and updates to ensure stability and reliability.

We believe this upgrade will significantly enhance your experience with our product and provide a more robust and secure platform.

Improvements

- XLT-5286 - Notify users about the upcoming node archival.
- XLT-5282 - Exalate After Sandbox Refresh

Bug fixes

- XLT-5285 - Email notifications backoff env variable.

Security

- XLT-4837 - [Pentest - Medium] Reflected Cross-Site Scripting (XSS).
