

Reporting & Visibility

Last Modified on 11/26/2024 7:28 am EST

Enhance visibility and reporting across all integrated systems by consolidating data and creating unified dashboards and reports in one of them. This use case is crucial for organizations that need to track performance, monitor operations, and make data-driven decisions based on real-time insights from various sources.

Ensure Alignment for Merged Companies

Synchronize data from different systems following a merger or acquisition to ensure organizational alignment. This use case is essential for providing a unified view of the newly combined entities, maintaining operational continuity, and ensuring that reporting and visibility are consistent across the merged organization.

Keep Certain Projects Visible via a Customer-facing System

Ensure that specific internal projects are accessible through a customer-facing system, allowing clients or stakeholders to stay informed while keeping sensitive information secure. This use case is useful for organizations that need to share project updates without exposing their entire internal workflow.

Ensure Supply-Distribution Chain Workflow within Their ITSM Tools

Ensure real-time updates and quick resolution of issues in the supply chain management process. This use case is crucial for improving partner satisfaction and enhancing operational efficiency by maintaining seamless communication and data synchronization across all supply chain components.

Allow Sales & CS Real-time View on Escalated Tickets

This use case enables Sales and Customer Success (CS) teams to have real-time visibility into customer tickets that have been escalated to Support or Development. By leveraging Exalate, the system ensures that all relevant stakeholders can monitor the status of escalated issues as they progress through the resolution process. This seamless integration keeps the Sales and CS teams informed, reducing the need for manual updates and ensuring that they are always equipped with the latest information to communicate effectively with customers.
