

# Create and Manage Networks in SyncRoom

Last Modified on 04/19/2025 5:27 am EDT

In SyncRoom, networks help you organize and manage your Exalate nodes and connections efficiently. You can find all existing networks under the **Networks** tab.

## Adding a New Network

To create a new network:

1. Navigate to the **Networks** tab.
2. Click **Add Network**.
3. Enter a **Network Name** and a brief **Purpose** description.
4. Click **Add Network** to confirm.

Once created, you can access the network page to start managing nodes.

## Managing a Network

# Network Orlando

Connections Nodes

## Connections in Orlando + Import connections

Search Sort by

↔ **PMs\_to\_DevTeam** active Edit ⋮

Last Sync: 2 days ago (Bell-3 ↔ 420)

Synced Pairs: 102

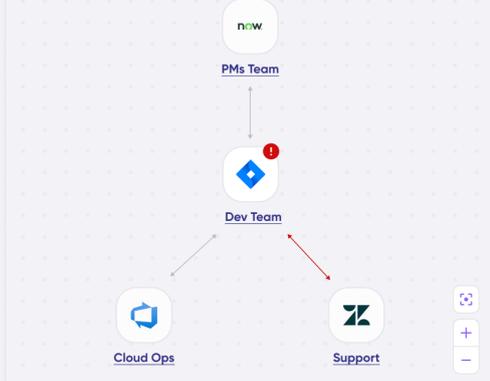

---

↔ **DevTeam\_to\_Support** active Edit ⋮

Last Sync: 17 minutes ago (SUP-123 ↔ DEV-345)

Synced Pairs: 358

## Network visual

On the **Network** page, you'll find:

- The **Network Name** and **Purpose**.
- A **visual overview** of all connected nodes.
- A **list of the connections in the network**.
- A **list of node requests**, showing pending nodes that need approval.
- A **possibility to import more connections or nodes** to your network.
