

Connection Details Overview

Last Modified on 05/07/2025 8:57 am EDT

The **Connection Details** page gives you a comprehensive view of everything happening within a specific connection, on both sides.

How to Access

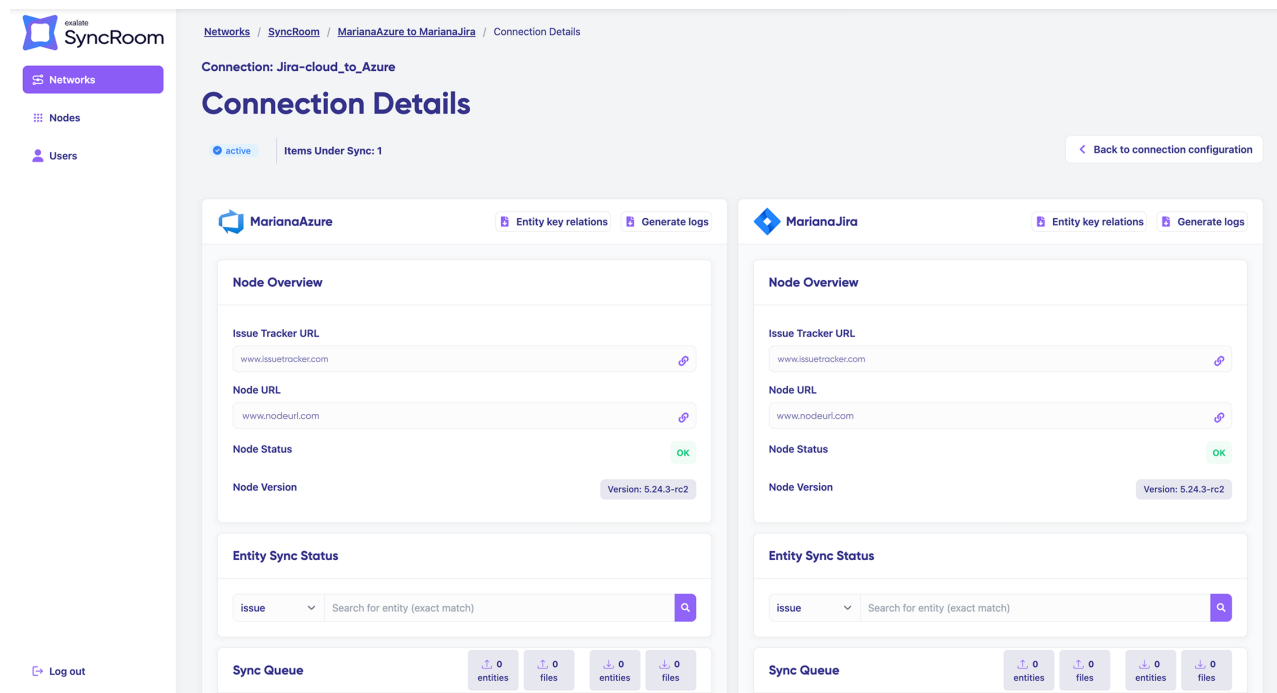

You can open the Connection Details page in two ways:

- From the **Connections list**, click the three-dot action button next to a connection and select **View connection details**.
- From the **connection configuration page**, click the **View connection details** button in the top-right corner.

What You'll Find Here

The page provides detailed insights into both sides of the connection:

- Connection Status
- Number of issues under sync
- Node status and node version
- Issue tracker and node URLs
- Sync queue monitoring and the ability to search for a specific entity to check its sync status

Additional Tools

From this page, you can also:

- **Download logs** for each node
- **Export entity key relation files** for further analysis or troubleshooting

The Connection Details page is your go-to spot for troubleshooting, validation, and monitoring everything that flows between your integrated systems.
