

# Add New Users to the Network

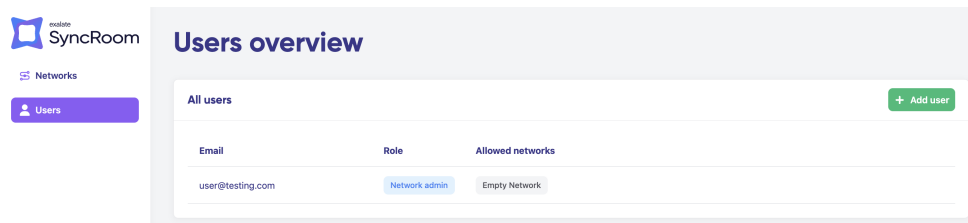

Last Modified on 05/28/2025 8:32 am EDT

You can invite other users to manage your network by assigning them the same admin rights you currently have.

You can only add new users **after creating at least one network**.

Here's how to add new users:

1. Go to the **Users** tab.
2. Click **+Add User**.

3. Enter the **email address** of the person you want to invite.

A screenshot of a modal window titled 'Add new user' with a close button (X) in the top right corner. The form contains three sections: 'Email' with a text input field containing 'user@email.com'; 'Role' with a dropdown menu showing 'Network admin'; and 'Networks' with a multi-select field containing 'SyncRoom Demo' (with a close button X and a dropdown arrow). At the bottom right of the modal are two buttons: 'Cancel' and 'Add user' (which is green).

4. Check the **User Role**.  
*Currently, only the "Network Admin" role is available and preselected.*
5. Select the **networks** you want to assign to the user.  
They will have the **same level of access** to those networks as you do.
