

# How to Generate Client Secret for Azure DevOps

Last Modified on 07/09/2025 2:32 am EDT

## Generating a Client Secret for Exalate Node Registration and Login

Please follow these steps to generate your Client Secret:

1. In the [Azure portal](#), search for and select **App registrations**
2. From the list of registered applications, select the created for Exalate application
3. In the left-hand navigation pane of your application's overview, under the **Manage** section, click on **Certificates & secrets**
4. On the **Certificates & secrets** page, navigate to the **Client secrets** tab.
5. Click on **+ New client secret**
6. Add a new **Client Secret**

**Note:** After clicking **Add**, the **Client secret value** will be displayed **only once**.
