# How to Sync Pull Requests on GitHub

This article shows how to synchronize pull requests from GitHub to Jira issue.

## Introduction

Exalate considers GitHub pull requests as issues. Source side (GitHub). To start the synchronization of pull requests you need to create a trigger with the following query.

```
is:pr
```

**Incoming sync**

Send the issue type data from GitHub

```
replica.type = issue.type
```

h2 id="HowtosynchronizepullrequestsonGitHub?-Destinationside(Jira)">Destination side (Jira)

By default received pull requests are considered received issues. You can distinguish the received pull requests from the issues by setting a separate issue type. Check the example below for more details.

**Incoming sync**

Set '*Pull Request*' as the issue type name for the received pull requests from the GitHub.

```
if(replica.type.name == "Pull Request"){
    issue.typeName = "Pull Request"
}
```
