Adjusting Estimates

[setManuallyAdjust](#)

Selects this option to manually adjust the remaining estimate value by subtracting the amount of time you specify in this field.

[Product](#)

[SetRetain](#)

[About Us](#)

Select this option if you do not want to change the issue's remaining estimate value.

[Release History](#)

[Glossary](#)

[SetAutoAdjust](#)

[API Reference](#)

If the [worklog](#) is added, Exalate reduces the estimate of the issue by timeSpent of the [worklog](#).
