mergeAttachments

Last Modified on 01/30/2026 11:07 am EST

Signature

Helper	attachmentHelper
Signature	`mergeAttachments(IHubIssue issue,` IHubIssue replica)
Description	Add all the new attachments of the replica to the issue attachments. Remove all the removed attachments of the replica from the issue attachments.
Introduced in	0.12

Example use

```
issue.attachments = attachmentHelper.mergeAttachments(issue, replica)
```

Comment

This helper method is equivalent to:

```
// add all new attachments as listed in the replica
issue.attachments += replica.addedAttachments

// remove all attachments from the issue which have been removed in the remote issue
issue.attachments -= replica.removedAttachments
```

Be careful when specifying the following code, which deletes all local attachments which are not available on the replica.

```
issue.attachments = replica.attachments
```
