

# createVersion

Last Modified on 01/30/2026 11:09 am EST

## Signature

Helper	nodeHelper
Signature	createVersion(IHubIssue issue, String versionName, String description)
Description	Create a version in the project of the issue
Introduced in	1.2.0

## Example use

Following snippet copies versions from the replica to the issue, and creates it on the fly.

```
issue.fixVersions = replica.fixVersions.collect {  
  v -> nodeHelper.createVersion(issue, v.name, v.description)  
}
```

## Comments

- **If the project has already a version with the version name, the version itself is returned else it creates a new version in the project and return it.**  
[About Us](#) [Release History](#)
- **If the version cannot be created (due to permission problems), a null is returned, no error is raised.**
