findInGroup

Last Modified on 01/30/2026 11:18 am EST

Signature

Helper	userHelper
Signature	`findInGroup(String group)`
Description	Returns a list of users that are members of the specified group.
Introduced in	0.12.0

Example use

```
if (replica.priority.name == "Blocker" &&
  replica.resolution == null &&
  replica.affectedVersions.any {it.released}) {
  def qaUsers = userHelper.findInGroup("qa-team")
  issue.comments = commentHelper.addComment(
    "A blocker bug detected after the release! CC: ${ qaUsers.collect { "[~${it.username}]" }.join(", ") }".toString(),
    issue.comments
  )
}
```

Comments

You can use this method to get all the users in a group and use them in user-related operations. For example, mentioning QA users in a comment when there's a blocker bug detected.
