

# transition as proxyuser

Last Modified on 01/30/2026 11:20 am EST

## Signature

Helper	workflowHelper
Signature	transition(Issue issue, String transitionName)
Description	Transitions the issue using the transitionName on behalf of the Proxy user
Introduced in	0.13

## Example use

```
if (issue.status.name == "In Progress" && replica.status.name == "Resolved") {  
    workflowHelper.transition(issue, "Resolve")  
}
```

## Comments

- If Exalate does not find a transition with the provided transitionName, the issue status transition will not happen

**Note:** transitionName is case sensitive "**In Progress**" is different from "**In progress**". The proxy user cannot execute an issue transition if the workflow condition fails
