getStatus (qcHelper)

Signature

Helper	qcHelper
Signature	getStatus(String statusName)
Description	Returns a hub status with the provided name

Example use

Set the defect status to ready for incoming issues.

```
defect.status = qcHelper.getStatus("Ready")
```

Set defect status to **Fixed** if the remote issue status is **Done** and resolution is **Fixed**.

```
def desiredStatusName
if (replica.status?.name == "Done" && replica.resolution?.name == "Done") {
  desiredStatusName = "Fixed"
}
def desiredStatus = qcHelper.getStatus(desiredStatusName)
if (desiredStatus) {
  defect.status = desiredStatus
}
```
