

What is the Max Attachment Size that Exalate Can Synchronize?

Last Modified on 02/10/2026 6:29 am EST

The maximum attachment size that you can synchronize depends on a couple of factors:

- the attachment size limit on both instances (you can configure the max attachment size in Jira)
- instance HTTP/HTTPS connection timeouts

Product

We've tested the synchronization of attachments with the size up to 1 GB and it worked without any issues.

Also, bigger attachments should not be a problem either.
