

Create and Manage Workspaces

Last Modified on 01/15/2026 9:26 am EST

In New Exalate console, Workspaces help you organize and manage your systems and connections efficiently. You can find all existing workspaces under the Workspaces tab.

The screenshot shows the 'Workspaces' page in the Exalate console. The left sidebar includes links for Workspaces, Users, Settings, and Resources. The main area is titled 'Workspaces' and shows 'My Workspaces' with three entries: 'Orlando' (3 nodes), 'Acquarius' (6 nodes), and 'Cassiopeia' (2 nodes). Each workspace card includes a 'Description' and a 'View Workspace' button. A green 'Create Workspace' button is located in the top right corner of the workspace list area. The bottom left of the page shows the user information: 'John Doe' and 'System Admin'.

Adding a New Workspace

To create a new workspace:

1. Navigate to the **Workspaces** tab.
2. Click **Create Workspace**.
3. Enter a **Workspace Name** and a **Description**.
4. Click **Create Workspace** to confirm.

Once created, you can access the workspace page to start managing connections and nodes.

Log out

On the **Workspace** page, you'll find:

- The **Workspace Name** and **Description**.
- A **visual overview** of all connected systems.
- A **list of the connections in the workspace**.
- **Pending list of node requests**, showing pending nodes that need approval.
- **About Us** [?](#)
Release History [?](#)
- **A possibility to import more connections or nodes** to your workspace.
