

Jira On Premise - Version 5.27.0

Last Modified on 02/03/2026 6:02 am EST

Released for Jira On Premise on July 29th, 2025

[?](#) Sync Worker Control to Prevent Unintended Synchronization

Added the ability for Exalate administrators to control when sync workers start. This helps prevent unintended synchronization between staging and production environments during setup. Sync workers can now be disabled by default and manually activated when needed, ensuring safer configuration handling. More details [here](#).

In this release, we've resolved the following issues and added improvement:

Bug fixes

- XLT-6851 - **Exalate's anonymous requests are blocked by Jira 10's dark feature security changes;**
- XLT-6188 - **Variable value is shown on Sync panel.**

Improvements

- XLT-4260 - **Added sync worker control to prevent unintended synchronization in staging and production environments.**

Known issues:

[API Reference](#) [?](#)
• XLT-6200 - Duplicate event notifications when sync workers are disabled;
- XLT-6486 - Network errors may occur on secondary nodes after pausing a connected node;
- XLT-6906 - Sync errors occur on node restart in multi-node setups.
